Gmail Notifier Pro

Download and install Gmail Notifier Pro 6.0.0 Pro. Gmail Notifier is a utility that lets you monitor and track your email account simultaneously on the web, on your mobile and, of course, on your computer. Shows new email alerts from your email account, and lists the email messages in details. One window to monitor all your emails. Real Time Email Notifications! Gives you real-time email notifications. Email alerts are displayed in a separate window when a new email is received. You can check your Gmail and Yahoo! Mail in Windows, Mac, or Linux. Multiple Gmail Accounts Support! You can monitor all of your multiple Gmail accounts at once. You can monitor or check new messages from multiple Gmail accounts. Gmail Notifier Pro Preferences: Setting preferences, such as the font used in the notification windows and customized sounds, are important. If you change the settings, please remember to reload your browser to see the changes. For Firefox Users In order to use the Firefox Add-ons SDK, you need to install the following components: (1) Command-line interface (CLI) (2) WebSockets (In order to connect with Gmail, you must install WebSocket Wrapper) In the Command line, type "firefox" then the "addon" and save it in a folder in your profile directory. Firefox will automatically add your cli to your "Tools->Add-ons->Extensions". To open, click the "view" icon on the right side, and then select "Tools->Add-ons->QuickLaunch" If you use mozilla-classic, "components" is under "TOOLS" and "addons-all-remote" is under "TOOLS" tab. If you use Firefox 48 or newer version, firefox.exe should start automatically when you run Notifier. If you use any other browser, please follow instructions provided by the browser you are using. Firefox Add-Ons SDK Download and install the official Firefox Add-ons SDK. Before you start, there is a necessary step to configure the sdk to connect to Gmail successfully. If you have a request to perform configuring for the Gmail Add-on, please refer to the following instructions: (1) WebSockets For Google Chrome Users Open "chrome://extensions" and
