---

popular file formats to PDF. It can also merge multiple PDF files into a single PDF file. It can handle difficult situations such as PDFs from several different sources, PDFs that have locked pages, pages-per-PDF, or merged PDFs that have inter-

PDFMaker 6 simplifies the steps involved in creating a PDF file. There are

---

just a few ways to create one. First, you can open a document or a PDF file, then either create or modify an existing one. Second, you can open a document or a PDF file, then click the "Create PDF" button to create a new PDF file based on the

---

template. PDFMaker 6 then offers you several basic templates, along with several more sophisticated templates that you can modify. You can also create PDFs without using templates. From these basic templates, you can

---

click the "Modify" button to move or resize a portion of the document, add text to selected text boxes, apply signature or watermark to the document, or open additional documents and include them. In addition to these basic features, you

---

can add fancy boxes or other objects to the document. You can further modify a PDF file with PDFMaker 6. Under the main "Modify" tab, there are options for rotating, flipping, and cropping documents; rotating text and adding text boxes;

outages and natural  
disasters. And,  
because instead of
