
Ps2 Bios Jp Scph 30000 27

The three original PS2 models (SCPH-10000, SCPH-15000 and SCPH-18000) were sold only in Japan and did not have an expansion bay like later PS2 models. Therefore, they could not be used with PC-compatible games. In Japan, special cartridges were produced for them that could play PS2 and PS1 games. These cartridges had two different connectors - a standard USB port (which could play PS2 games) and a standard PS2 port (which could play PS1 games). In the U.S., the PS2 was sold with a cartridge for the PC version, which could be used to play PS2 and PS1 games.
