AutoCAD software for AutoCAD 2020 owners now includes the latest release of Markup Assist. This new version includes enhancements that will greatly improve your workflow. (AutoCAD 2023 update will be available in December 2018) Markup Assist includes a new feature that makes it easy to get your comments on drawings. These comments can be scanned, attached, or emailed, and the changes you make to the drawings are applied automatically. The process of scanning comments to AutoCAD is as simple as marking up a sheet of paper, attaching the comments, and sending it all to AutoCAD. (AutoCAD 2023 update will be available in December 2018) New Markup Import Options The Markup Import feature now has two new options for importing comments from paper drawings and PDFs. Automatic: Send documents directly to AutoCAD with the current drawing metadata. Manual: Set up a specific folder to transfer documents from, and transfer documents manually. Automatic now also takes into consideration drawings that have a "do not import" flag. The button in the Markup Import dialog for that draw type no longer appears when there are no imported comments. (AutoCAD 2023 update will be available in December 2018) Directly attached comments are no longer carried across drawing edits. In AutoCAD 2013 and earlier, comments were linked to the current drawing. You can now attach comments with a shortcut key. The Import Comments prompt now includes a new Quick Options button. (AutoCAD 2023 update will be available in December 2018) A new Export Comments prompt now includes a Quick Options button. (AutoCAD 2023 update will be available in December 2018) Link Comments to Drawing If you have comments attached to a drawing that you want to link to that drawing, you can do that. You can link comments to a drawing even if you don't have the drawing open in AutoCAD. This is helpful when you are waiting to see how your design works with other elements. When you create a linked drawing, you can include comments you have already imported into the drawing. Linking comments requires having the drawing open in AutoCAD. In previous versions of AutoCAD, you could link comments to

drawings, but only by using command letters, which makes it
