After a long and prosperous reign in the Black Desert Mountain Range, Queen Ariana has fallen. It is up to you to embark on a perilous journey to seek out the lost queen and bring peace to the land.

**About the Story**

After the fall of her kingdom, the last queen, Ariana, was left for dead. After an escape from the calvary, Ariana came across a hill off the edges of the Black Desert area, in which an ancient dragon statue was taken out by an enemy. The calvary soon found her and burned down her hut, but the queen somehow survived the fire. Ariana then made it over to the next ridge, where she found that a small village was nestled there. Ariana found a small girl who told her a prophecy, that an older woman, Alicia, would take care of her daughter. But before they could travel any farther, Ariana was found by dragons who took her in. They told Ariana that she has fallen, and that she may help with the Emerald Dragons to counter the Dark Emerald dragons. Together, Ariana, Alicia and the Emerald dragons had a journey in which they searched for the lost queen of the Emerald Dragons. Finally, they found her and Ariana cured the Emerald dragons, and ended the war between the Emerald Dragons and the Dark Emerald dragons.

**How To Play**

- (1) Use the directional pad to aim and move your dragon.
- (2) Press A to attack.
- (3) Press Down to use a potion.
- (4) Press Space to slow down.
- (5) Press Left or Right to go to the previous screen.
- (6) Press Triangle or Square to go to the HUD. The HUD shows your health, potion and dragon type.

TechCrunchTV reports on the latest trends in game play and virtual reality usage. My Virtual Reality Experience: Google Cardboard Review. TNW. Mondly VR is leading the charge in the VR space with its foreign-language teaching app. As virtual reality technology becomes more mainstream, enterprise and consumer applications are being developed and built. There are a couple of companies and individuals developing what is known as “VR experiences” of the type that most people are familiar with—the Oculus Rift and HTC Vive. While the two commercial versions of VR headsets are relatively inexpensive, the field has long been experimenting with small, light VR headsets, such as Google Cardboard and VRKiss. In the past year, VR headset makers like Samsung, Vive and Microsoft have worked with non-tech companies to produce different versions of VR software specifically designed for corporate and educational use, depending on requirements like accessibility, aesthetics and engagement. Mondly VR is leading the charge in the VR space with its foreign-language teaching app. Mondly VR is leading the charge in the VR space with its foreign-language teaching app. On Wednesday, the San Francisco-based firm launched a new mobile app called Mondly VR to teach languages in a more immersive virtual reality experience than what was previously available. The app creates a virtual reality experience in which learners are placed into a virtual classroom and asked to speak a foreign language via a digital avatar. The app, which launches with more than 70 languages, is free for Google Cardboard and the company's headset and requires

## **What's new in Influent DLC - Magyar [Learn Hungarian]:**

**The Citizen Soldiers are slowly gaining momentum. Thanks to the combined efforts of our six member teams, we're now almost assuredly in a position to join the ranks of the Empire with one BIG WIN! If you want to see the result of all this energy & blood, then check out this video: The Empire will have up to 10 flags of territory (6 on each side), but if the Citizen Soldiers can bring a total 30-40% to bear on our front lines, we're going to be in a helluva good position to reduce the distance our enemies need to travel to gobble up their squares. So, in this installment of the Flash Report, I'll be doing some unpacking on that mission. First, though, the important news about the battlefield in the 5 Days of Ground Clinch: The Enemy Night Run will be staged in the territory of the Undaunted Soldiers of the Civil War. And the Front Fields have just gotten a little more fertile soil for spotting it. Between the rebellion being planned for tomorrow and the Elite Front Field Anti-Reb rumble on Day 3, these Front Fields should be truly nutso. But we'll talk more about that next time ... For now, let's focus on the most important occupant of these Big Red Hill Front Fields: It's usual beehive. That's Agent 67's strategy for dealing with the danger to her front lines. But what's REALLY interesting is what's happening in the back half of that hive. Someone's left a sign for us. It says ... NOTE: Many more details will be forthcoming in future updates. Until then, for more information on this mission, see the latest update at the Battle of Ground Clinch Swarm blog, or watch this video on the Realmcast Channel over at Realmcast, which also features a new Day 1 mission. For more details on this mission and the year's other competitive historical games, check out this article in the latest issue of World War One: An Illustrated History. Thanks for playing. If you're looking for the "single most important event" of the battle - the moment that put us on the map as "citizen soldiers" - I would have to say it was the day on which our General thought fit to give each of her sons a medal in her stead (the one son**
