Dream.Archiv.Deutsche.Wissenschaft.Usm-Download.The present
invention relates to a low power consumption apparatus and method for
recording data and to a recording medium. Magnetic recording has
conventionally been performed on magnetic recording media such as
magnetic tape and magnetic disk. However, the most compact recording
media are optical discs. Such optical disc recording media include: DVD-
RAM for writing data by irradiating a pulsed laser; DVD-RW for writing
data by irradiating a pulsed laser; and DVD-R for reading data by
irradiating a laser beam. Both of the above-mentioned DVD-RAM and DVD-
RW have a property that the laser beam is irradiated for a long period of
time while the recording medium is rotated at a high speed. If a reading
operation is performed repeatedly from the same position on d0c515b9f4
