The cenotaph of Rixx Javix Famous for inventing the jump drive and founding the star-faring race of K'Aryat, Rixx has mysteriously vanished. A search party will set out to find Rixx Javix and the his fleet of The Glorious Dead. The K'Aryat must follow the path of the missing K'Aryat, to the sands of the desert, and across the boiling desert canyons, and eventually to the secret, hidden tomb of

Rixx. The star of Rixx's fleet - the mighty Koronus The Koronus is a class of mid-sized cruiser found in the deserts of Kharak. Their menacing silhouette strikes fear into any who oppose them. The Flying Fortress The Pa'raglas are an ancient race of freighter pilots, who fly enormous custom-built cargo ships across the endless skies of Kharak. Whether they are bringing you the dried fruits of the desert or shipping off the operations of the secret weapon project, their ships are always heavily guarded. Squall The Squall is a four-masted fleet corvette of the Pa'raglas. Fast and agile, it is built for jungle and ocean combat. The Renducer The Renducers of Pa'raglas are the flagship of the pa'raglas fleet. Bred from the evil energy of the ship's namesake, they are among the most powerful ships in the galaxy. Sovereign The Sovereign is a large and fragile combat cruiser of the Pa'raglas. Quick and agile, the Sovereign can switch between a cloaking and a de-cloaking state to great advantage. The Whaler The Whaler is a small assault ship of the Pa'raglas fleet. It's primary role is to provide cover while carrying out boarding operations on enemy ships. Kelu Phanoc A tectonic driven humbug of a creature. Kelu Phanoc are the largest creatures on Kharak and ruling beasts of the desert. They live in groups of 25. Armed with a powerful bite, they use their torsos to crowd enemies, crushing them into the desert. Rixx's Glorious Dead An ancient and respected fleet of star-faring K'Aryat. They're known for the massed formation of their c9d1549cdd

Venture to the depths of space and down into a subterranean alien world. Find out what

happened to the U.S.S. Enterprise as you jump aboard the ship and explore. You will find the layout of the ship is similar to the N.U.S.A. space station, but with less technology. You start off on a science vessel during a routine survey mission. You wake up in a science laboratory and see no one else alive, but are told to leave as there are no longer any robots. You go down a stairway and find yourself in the engine room, where you meet the ship's engineer. He gives you some coordinates for a nearby asteroid to find. You board a shuttle and fly off into space. You see several attack drones and chase them away. When you arrive at the asteroid you find some dead bodies and a destroyed support ship. While trying to get back to your shuttle you find the engines are off and the ship is not responding to your communications. You climb up a ladder to get to the reactor, only to find a smashed up bridge. PROFILES Advanced Networking There are many types of networking and there are many useful functions that you can perform with each one. Here are some tips on how to improve your networking in game. 1. Your Network Settings - This section controls your connection options and how the game takes network load. There are three major network settings, main, compatible, and save. Main: The main connection is the connection to your

servers, which are designed to be fast and efficient at server load times. If you have a slow connection, this is the setting to change to in order to get around congestion issues, but it's strongly recommended that you set this to compatibles to prevent any problems. Compatible: The compatible connection is the one that has a full screen capability for multiplayer. It enables you to connect with people from various internet locations. This can be a good setting for when you're in a coffee shop that has terrible internet. Save: This is the save connection. It enables you to save the game anywhere you like. It's especially useful when you want to save a game after an internet break! 2. Connection Bandwidth - Different speed connections may make game browsing much slower. This tab allows you to alter the bandwidth of your connection to balance the game between game speed and loading times. 3. Connection Mode - The broadband connection
