If you're a highly successful CEO, you've likely risen to the position by developing a team of people who are dedicated to achieving your vision. And that team may consist of many different types of employees: marketers, engineers, HR specialists, etc. It's not unusual to have a CEO whose role in the organization is primarily as a leader. However, in order to lead a successful team you have to be part of the team yourself, and that's a crucial part of being a great CEO. Consider this: If you're a senior member of a team, and you're leading it well, it's not the CEO's job to teach the team members how to lead. And if you're not part of the team, it doesn't make sense to come in and tell the team how to run the company. These days it is possible to be a highly successful leader without being a member of the team. The challenge is that leadership must be continuous and it must be highly visible.
