[Gallery View All] an V: Introduction International eSports Association (IAA), acronym MENTOR, in English Master of Engineering in Open source and Internet Technology, The International Computer Games Association (ICGA) is an international NGO for the sports and games industry. It focuses on the industry and on the development of the computer game as an entertainment product. In 1996, it established two First-tier gaming tournaments. The main objective of the series of tournaments is to stimulate the development of the computer games industry in Europe. One of the many former programming languages was originally designed for this task of moving data from one point in a computer to another point, and doing arithmetic with the data as it moved. The most important ones were FORTRAN and COBOL. Since CPUs are devices to process instructions and since programming a CPU is easy, and it is the structure of the CPU that controls the execution of programming instructions, the CPU itself can also be considered a language. The application of these concepts is called parallel programming. Since Intel's first microprocessors, they have used an instruction set that included bytecodes, the first of which was the Intel 8086 which was created by Federico Faggin and Pietro Abate, and was released in 1976. Later versions of the 8086 were dubbed the i8086, with the third version, the i80386, being the most popular of them. From 1983 to 1993 the i80386 was also the main assembly language. An unofficial updated i386 assembly language was derived from the Intel
