### **What's New In Topaz Star Effects?**

Easily apply amazing, realistic lighting effects to your pictures to transform them into stunning masterpieces! Add all sorts of fantastic effects to enhance your pictures with a few easy clicks! Intuitive interface for creating and applying stunning effects Add all sorts of effects with a few clicks. Create and edit effects easily Start creating

---

and editing real time! With Topaz Star Effects, you can easily enhance your pictures with a few easy clicks. The interface is quite straightforward. In order to apply a star effect, you need to click the plus sign and select the star effect you want to use. You will then be able to move it to any location on the canvas. Likewise, you can use the tool for moving a star effect on a picture to a different location. You have a chance to include more than one star effect in

---

your picture. Just click the first star, then a second one. You can also include up to five stars in a single effect. Still, you cannot combine effects in groups. The star effects come in plenty, ranging from gentle and warm candlelight to explosive sun flares. Pick the one that suits your artistic vision. Add as many star effects as you want. Light effects by real-life objects in the real world. As the examples show, all the lighting effects work in real time. You will be able to see them

---

flickering as they are being applied. You can use the shortcut keys, or the panel's scroll bar, to control the behavior of the stars. If you want the effect to be animated, for example, you can use the F key. You can also control how the effect looks using the customization panel. For instance, you can adjust the color balance, saturation, graininess, blur and sharpness. If you choose the tweak option, the effect's parameters will be stored under the adjustment

---

panel, but you can always view them again. The star effects can be applied to selected layers or the entire image. You can also specify whether you want the effects to be applied to the entire image, or a specific layer, or a selection. If you choose the latter, the activated layer will be highlighted as soon as you start working on the project. Topaz Star Effects can create lighting effects using the natural light or the artificial light provided by the sun, moon, fire and flash. If you prefer using the latter, the

---

tool automatically detects which light source is present in your photo and displays the correct stars. You can alter

---

## **System Requirements:**
