Rento is a new take on the cooperative building game genre. Rento allows you to create a custom game with your friends or just play solo. The idea is simple. Players each select a set of four cards and place their property down on the rentable table. Players can then either choose to build on their card or sell it for cash. However, with the current meta game in place, the players with the best cards will always win. Each game becomes a high-stress competition to build the best property. Will you be able to beat your friends? Or will you be caught up by your opponents? It's a game of strategy and luck to build a house worth a fortune, but with enough friends to back you, the best renthouse in Rento will be yours! Features: Players will need to purchase colored property (houses, shops, etc) for their rentable table Choose either build or sell mode to place properties Players can create games with their friends and trade their properties in game Choose the quantity of buildings you will be able to rent The map editor is available to create custom boards as well as maps and games Players can build on the board that they created to play the game Customers can pay with 0.01, 0.02, 0.05, 0.1, 0.5, 1, 2, 4, 6 or 10 rent tokens Players can choose to play with up to 6 players in one game or with 2 players in solo mode Each player will start with 5 rent tokens. Thanks to some special considerations to the Rento Meta-game, the party will never be able to wipe out your properties without cash. Play a new game and be the first to see the best high-risk / high-reward roll to be! Graphics: Rento game is played in 2D mode The game is rendered in Flash for PC and Mac, using the stage3D API The game has good graphic designed that is easy to follow Supported keyboards: 1 - WASD 2 - QWERTY 3 - ABNT2 + Arrow 4 - Function keys 5 - CTRL 6 - CAPSLOCK 7 - SHIFT 8 - ALT 9 - PageUp / PageDown 10 - HOME 11 - END 12 - LEFT CLICK 13 - RIGHT CLICK 14 - SPACEBAR 15 - SUPER KEY 16 - MINUS KEY Currency:

What's new in Rento Fortune - Map Editor:

Location Editor Earn Fortune Points Link Example The new map editor! Enter a new dimension of wealth, fame and fame: rent! Here you will have the chance to discover fortunes and marvel at the stories told behind the names of your neighbours, those who share valuable land with you. Rent estimates will be updated based on your property balance.Rent: the one and only new feature of the mountain of changes the RentOffice team has prepared to make their last release the best ever! Features 1. Ease of use: As always, you need to perform the following actions to get your farm started: i. Validate the map and confirm all the items; ii. Set the rent for an item/s; iii. Simulate the rent and wait until its fair enough; iv. Hide the non-rented items.Please note that we have pre-verified that the viewport works on PC, Mac, Linux and even the consoles! When its finished, the viewport is easily accessible, regardless of the programming language you use. For example, on OSX, just go to Build -> Open Developer Tool (on Linux: Control + Alt + T), click on the icon showing the 'toolbox' and open any of the tools found there. 2. Rent-Futures: Item-specific rent variations over time are automatically computed every week.You need to manage only the item settings, the balance of the item and the rent itself. This has no hidden calculations and can be done with everything on screen at a single glance. 3. Steps to set the rent: Purchase an item. Choose the 'building'. Set the prices. Set a rent forecast. Click 'apply'. REQUIRED AT THIS STAGE: Have a look at the END OF THE QUERY BOARD. 4. User Interface: When it comes to the user interface we knew that we were going to fight for several things: simplicity, accessibility and cleanness. We didn't want to do 'perish stuff': the interface is always clean and minimalistic, even the unnecessary buttons.We made a lot of progress in this direction and we are planning to publish one more video, maybe in the next week, to show you all the consequences this has had on the development and how much space on hard drives we are saving! After a brief look at
