I bought an e-mail template recently and I need to get the new logo onto it. I uploaded the file to one of my many hosting websites and when I loaded it, it gave a 404 error. I tried uploading it a second time with the same result. Finally, I uploaded it with the file manager and the upload worked, but when I then tried to embed it into my WordPress site, it would not work. I tried changing the text and colors, but it is the same. Any ideas what might be going on with this? I appreciate your patience, and I'm trying to put a hold on the

purchase on my website. Maybe I could give you some money for the troubles? It looks like you used one of my graphics for the background. That's a whole different issue. You have to get permissions from me first. To contact me, go to my username on topic. That's R :tred :wf. I also own the rights to all graphics as well as the e-mail template. I was hoping for something that was a little more professional-looking than the awesome gift we got, but I guess if you're not gonna use it, I'll have to do what I do best and complain.
