From 18th-century England to the Louisiana bayou to the Chicago Stockyards to Downton Abbey, Wallin tracked down stories about the people who often go unnoticed — black and white and brown. And in the process, he became one of them. "I

was a little bird trying to fly,”
Wallin said in an interview at his
home near Springfield, Mass.
Wallin is the author of “Scales on

two women from 1770s London,
one of them white and one of them
enslaved. The book was published
by Simon and Schuster in 2012.
