Use the Markup Assistant to apply MS Office® 2003 VBA functions to your drawings. If you don't have any macros from Microsoft Office, you can

create simple functions to automate repetitive tasks and eliminate retyping. (video: 4:24 min.) Hierarchical Modeling with Dynamic Blocks: Organize your design content by creating dynamic blocks that represent a unique, dynamic, and repeatable set of objects. A dynamic block is a single object with multiple attributes and relationships

that create a unique graphical model. (video: 1:37 min.) Add a web browser with which to take advantage of dynamic blocks. Every block can contain a web address to send designs to the web or to synchronize to Microsoft® SharePoint® on the web. (video: 1:37 min.) Simplify the creation and export of dynamic blocks. With Dynamic

Blocks, you can draw blocks with attributes, relationships, and properties. Save them in the drawing or export them to an AutoCAD® DWG file. Dynamic Blocks can also be easily shared with other people for collaboration or reuse. (video: 1:32 min.) Create relationships between entities in your model. Draw block sets with unique

attributes that can be used as relationships between entities. Dynamic Block Sets are objects that have their own attributes and relationships, and can be used to categorize models. (video: 2:12 min.) Command-Line Interface: Automatic reticulation for better 3D display. Reticulation automatically lays out 3D

geometry on 2D surfaces. New model types include shells, cells, tubes, cylinders, manifolds, and solids. Advanced reticulation options include customization of the outer surface of models. (video: 2:45 min.) Create any type of model you can imagine. Create complex models using any type of entity such as rectangles, circles, arcs,

splines, lines, and surfaces. Model properties such as dimensions, names, and placement information are available with all entity types. (video: 2:00 min.) Get more functionality out of the command line with new commands. Common industry and aerospace command-line tools are available for use in AutoCAD® 2023. Unlimited views

and filters. With filters, you can apply various objects to the current view of your drawing. Using the new view mode, you can view unlimited views of your drawing. (
