If you are having trouble installing your driver, you should use the Driver Update Utility for SilverCrest. It is a software utility that automatically finds, downloads and installs the right driver for your system. You can even backup your drivers before making any changes, and revert back in case there were any problems. You can safely update all of your drivers in just a few clicks. If your driver is not listed and you know the model name or number of your SilverCrest device, you can use it to search our driver archive for your SilverCrest device model. Simply type the model name and/or number into the search box and click the Search button. You may see different versions in the results. Choose the best match for your PC and operating system. You can even backup your drivers before making any changes, and revert back in case there were any problems. You can safely update all of your drivers in just a few clicks. Once you download and run the utility, it will scan for out-of-date or missing drivers: I've never had a problem with their cards as they work well with other devices. Also if you have an old Mac, it will run OS X 10.7.5, which you can upgrade. Older Macs don't usually have problems with newer OS versions when using compatible hardware. You'll need to run a file called 'USB Detect' to see if it will run on your particular Mac. Just go to the start menu and type USB Detect. It should show up as an application. Run it and it'll tell you if your card is supported.
