What's New in the 5Star AVI Video Splitter?

5Star AVI Video Splitter is a professional and easy to use piece of software designed to trim, split or cut a large AVI video file into several smaller clips. And compared with other Video Splitters, 5Star AVI Video Splitter has so many additional features. 5Star AVI Video Splitter provides different

splitting method to make splitting easy. It offers split manually and automatically. It also splits equal parts by time. The very user-friendly and easy-to-use interface lets you easily preview video files. Very quick conversion speed and no quality is lost! This version is packed with many professional and new features, including:-

1. Support media file with any frame size
2. Support split any files into any folder on the hard disk, other than original video file folder.
3. Select any video formats as input file, including AVI, MPEG, VCD, SVCD, MOV, ASF, WMV, RM, MP4, FLV, WEBM, MKV, 3GP, M4V, etc.
4. Support any video files as output format, such as AVI, MPEG, VCD, SVCD, MOV, ASF, WMV, RM, MP4, FLV, WEBM, MKV, 3GP, M4V, etc.
5. Support automatic splitting and automatic trimming. The exact width and length of the video clip can be automatically determined. You can easily specify the cutting position and speed.
6. Set video file and directory as the output path, and specify the output format, including AVI, MPEG, VCD, SVCD, MOV, ASF, WMV, RM, MP4, FLV, WEBM, MKV, 3GP, M4V, MOV, etc.
7. Support batch splitting and cutting to many files at one time.
8. Split video files and directories at any time. Split file and directory into two, three, four or n clips at one time.
9. With split technology, you can easily cut off unwanted part of the original video. And your video will be still running smoothly after cut.
10. You can specify the split position, frame size, bit rate, frame rate, and color mode, to ensure that the video clip is completely the same as the original file.
11. The clipping area can be set in any folder of hard disk, other than original video file folder.
12. Split the video file by time, with any time interval and exact length. You can set the exact length of video clip after splitting. The video file will be completely trimmed after splitting.
13. Split the video file into any number of equal parts.
14. You can select the start frame and end frame of clip after splitting. The split position is
