is a professional utility designed to prevent access to adult content on the Internet. The utility consists of a "child mode" that works across multiple browsers (Internet Explorer, Mozilla, Opera and Google Chrome) that instantly shuts down the Internet browser after the initial visit to the so-called "dangerous websites". The free version of the program is limited to 3 simultaneous windows, while the pro version allows more. The blocking is based on lists compiled from reports

filed by users who found the sites to be unsafe. the program will display a red screen with a question mark symbol on the active window. The user must click "Continue" to get the blocked website through the Internet, or they can close the program. In order to turn the protection off, the user must click on the icon located on the toolbar.

AntiPorno Win is a light-weight application that offers a limited content blocking service on Windows operating systems. It can help you restrict access to websites that have content for mature audiences on Windows 7 and Windows 8. For the protection to work properly it is necessary that AntiPorno Win is installed in the same folder as Internet Explorer and the content you want to block is opened through this browser. AntiPorno Win is not a substitute for parental control, which

should always be implemented in your home and at school. Additional services, like parental control, not only protect your family from threats on the Internet, but also eliminate the risks of downloading and installing malware on your system. If you need protection against adult content, AntiPorno Win will not be able to save you from experiencing videos and images on websites, which contain content for adults. downloading and installing malware on your system. This application is compatible with Windows 7 and Windows 8. It blocks adult content and prevents access to inappropriate websites by terminating the activity of the web browser. Using this application is free, but blocking a page can take from 10 seconds to several minutes. The application requires the Internet Explorer browser to be installed on your system. When accessing a page, the blocked website cannot be restored, you will be redirected to the web browser window, where you can access the

content you were trying to avoid. In addition, it is possible to remove the blocked content by clicking on the link on the top-right side of the application. The application can be disabled by pressing the Ctrl+Shift+A key combination. A reset button is available on the interface to clear the blocked sites. During testing, the anti-adult content application worked efficiently in blocking sites, but, as a result, I could not access the web browser, which

It is a great tool to protect your children from online pornography or to protect your children from viewing adult content. Description: If you often need to make some backups, the simplest way to do it is to use the built-in Windows backup. But, sometimes, you may want to perform a full backup with the lowest possible impact on your system. A full backup of your Windows

system will do just that. This is a great way to save everything on your system in a single easy to use archive file. It does it without any prior configuration of your system, nor any other actions. The most important aspect of a full backup is that it will not affect your system in any way, you will not be asked to cancel any operation and your applications will not be affected. It is only an archive of all your files, folders and registry entries. It may not be easy to use but it is very reliable. AntiPorno Win Free Edition AntiPorno Win Free Edition 1. AntiPorno Win 2.
