## **Auto Mail Sender Birthday Edition License Key**

This Auto Mail Sender is the only program you need to send birthday emails to your friends, family, colleagues or business associates. You can easily create multiple email templates and populate them with the contacts in your address book, inserting the information about their birthdays, names, dates, age and gender. Then, it is easy to send a single or multiple birthday messages to several recipients with just a couple of clicks. Moreover, the application automatically inserts the correct dates in your message. The software comes with a series of greetings templates for holidays, such as Christmas, Valentines day, Mothers day, birthday of a friend, etc. The emails are configured automatically according to the names of the recipients, so you don't have to worry about getting them right. You can also set different templates for friends, business associates, relatives, and whatever you want, using the Customize Me window. Email templates can be configured in several ways: Text-based - You can insert the text using the Macros window, and then configure the text and color for each field. Images - The software supports several formats for images: GIF, JPG, JPEG, PNG and BMP. You can insert any image file. Background color - You can configure the background color for each field, as well as for the whole template. Fonts - The application supports several fonts, and you can set the correct font for each field. Signature - You can add a signature at the bottom of the email. Phone number - You can insert the phone number of the recipient, in order to speak with them directly. Amount - You can enter the correct amount for the recipient, if you need to ask for money. URL - You can insert the web address of the recipient, in order to send them a link. Default text for holidays - The software automatically calculates the correct text for the holidays. You can customize the text for each holiday. Customize Me - The Customize Me window enables you to edit any template element, in order to personalize the message, or insert any additional element. You can save the templates, send them, resend them, and even modify them. The email recipient can view the source of the template, or preview the result of sending an email, and receive a link to the email. Furthermore, the software can also send emails in bulk. With this feature, you can send thousands of messages, with just a few mouse clicks. Moreover,

## **What's New in the Auto Mail Sender Birthday Edition?**

In a world of new and exciting innovations, the Internet is often touted as a tool to save us from ourselves. After all, the Internet offers people a virtually limitless supply of information that was not previously available on-hand. And, it allows us to communicate with others, whenever we choose. While technology has inarguably helped us to keep in touch with our loved ones, the proliferation of blogs, social networks, and messaging apps have added yet another way for us to stay connected. But, while there are plenty of things that we can do on our own through the power of the Internet, there are also many things that the Internet simply cannot do for us. Whether you use your computer as an entertainment device, or a means to communicate with the outside world, it may be useful to consider the following. John Mathew: March 8th, 2013 Best Video Converter Pro 6.5.0.9 + Keygen Crack Full Version is a simple, powerful and all-in-one video converter application that can convert any video formats including AVI, MPEG, WMV, MP4, FLV to Windows Media Audio, MP3, WMA, M4A, AAC, OGG, WAV audio file formats.
