Overview The Garden Lily is not always the first plant that comes to mind when you think of Spring. But, the beautiful, lily like blooms are a mainstay here in the spring. Unlike other lily species, the Lily of the Valley's blooms have no central stalk, so it looks like a cluster of many flowers. The Lily of the Valley has a beautiful purple flower with 6, fleshy, pointed petals that are a little larger than those of the Lily of the Nile. However, they are the same length. And, the flower appears to be a series of separate but attached parts. Usually, the sepals remain on the plant through the summer and into the fall. The Lily of the Valley has a big seed pod that is about 1/2 inch long f988f36e3a
