Indium-111-labeled platelets have been used for visualization of blood platelets in patients following irradiation for carcinoma of the maxillary sinus and nasopharynx. The location and pathogenesis of this dermal hemorrhage is being investigated by an immunologic technique. B cells producing Fc antibodies have been identified in the patients' peripheral blood by the use of an immunofluorescent technique. The functional capacity of the Fc antibodies has been determined by assay techniques using Burkitt lymphoma cells. Il presidente del Regime classico, Moreno difende la sua politica di spending review I costi per la riforma del pensionamento anticipato sono comunque ancora a livelli di quattro anni fa, sia a livello di introiti che di investimenti. Così difenderà, prima che cominci la campagna elettorale del 5 marzo, che il suo governo abbia spento l'acceleratore di crescita del Regime. "Non credo che sia importante in questo momento - ha detto nel colloquio con i giornalisti di Repubblica - credo che sia doveroso, lo dico con chiarezza, la cittadinanza deve sapere
