Some Lightroom users might complain that this is not the case. There are some similarities, but not many. Compared to an expensive high-end photo editing solution, Lightroom is a more flexible photo editing application. To get started, you can import multiple RAW-files at once, and get to work right away with the "Quick Develop mode." Choosing which adjustments work best is relatively easy. Like Photoshop, Lightroom has a quiver of adjustment tools, but the lack of an Exposure Map, Spot Healing Brush, and Spot Removal tool is significant. Overall, the user experience is better and workflow is simpler. And with Lightroom 3. Capture screen, photos and video with the new Live HDR feature in Photoshop. Now you can control the amount of highlight and shadow from your image at any moment for unlimited dynamic range. Unlike Live HDR, previous forms of HDR processing are extremely time consuming and difficult to control. But now, when you need HDR after the fact, just go to Filter→HDR and Photoshop Gloss recovers the image for you in seconds. HDR. Simply choose whether to capture highlight, shadow, or both. The Live HDR dynamically updates the lighting information for the specific image you are working on and lets you regulate the amount of highlight versus shadow. In the Curves Panel, you can quickly adjust the entire image's highlight and shadow. Projects. Now you can access the new Projects Panel and find and give your files the name you want. Plus, the Project Cache is stored in the cloud, which means you can have multiple projects open at once, even when you're offline.

Many of us have re-drafted our careers, our working relationships and even our entire enterprise IT architecture to enable a work- and life-style that we feel passionate about. Last week, Adobe made some changes to workplace. It all can be summarized as: "Live up to your potential and be more productive." **Essentially, Adobe has the desire to be more like Apple. So they made some long overdue changes to reflect their transition from making creative tools to products that plug in to productivity apps and workflow-focused solutions.** However, there are some drawbacks. The first is that the company is cutting the cord from its Learning site. This is huge. **I think this has a potential to turn off and alienate current users and Adobe has to earn goodwill with them**. The second is that Learning , a hierarchy display, has been eliminated in favor of the new Adobe Authoring Cloud. Second, the announcement that Creative Cloud is now based around subscriptions, rather than perpetual licenses. The software is now considered Adobe's flagship with millions of users worldwide. Its $1,300 price tag is more than 100 times that of Photoshop Elements, the previous low-cost photo editor, according to Gartner. It's been the subject of outcry from practitioners, from some of the biggest names in the business such as entertainment company Paramount Pictures to directors Paul Thomas Anderson, Francis Ford Coppola, Christopher Nolan and Ridley Scott. 933d7f57e6
