What's New In Pidgin Ledz?

Pidgin Ledz is an unique iconset designed to allow you to customize your desktop with a set of new icons for your installed applications. This iconset has been designed to combine simplicity and

functionality for use in GNOME & Ubuntu. All icons have been created using the popular GIMP 2.6.11, without using any predefined images in the Icon Editor. These icons can be included in your GNOME panel, applications menu, or desktop with your choice of shape, size and color. Features - 336 * 344 pixel PNG icons - 256 * 256 pixel PNG icons - Source File - Maintain different icon shapes - Different icon sizes: 16px, 24px, 32px, 48px, 64px, 128px - Each color represents a different class of application - The folder icon has been replaced with a new one, of a similar size You don't have to have GNOME desktop environment installed in order to use the icons. You can download the following files as well as any of the other icons listed in the sidebar: - Pidgin Ledz.zip - A ZIP archive containing all the files you need. (536 KB) - Pidgin Ledz.tar.gz - A TAR archive containing all the files you need. (552 KB) IMPORTANT ===================================== Icons can be set to appear by default in your GNOME desktop menu, applications menu and on your desktop. However, some applications and preferences require icons to be added to their menus by hand. If you use any of the above features of Pidgin Ledz, you must add the icon manually by copying and pasting it into the menu. All icons can be set to appear in your desktop and in the panel. To set the icon to appear in your desktop, drag and drop it onto the desktop's desktop icon. To set the icon to appear in the panel, drag and drop it on the panel's icon, just below the message indicator icon. Installation ================ In order to install the icon on your system, you should first run the following commands: To update the list of installed applications in the panel: sudo apt-get install indicator-appmenu To add Pidgin Ledz icons to the panel: gconftool-2 --set --type bool /apps/panel/applets/appmenu_default/enabled true To add Pidgin Ledz icons to your desktop: gconftool-2 --set --type bool /apps/panel/applets/appmenu_default/visible_when_desktop_is_empty true To add Pidgin Ledz icons to your applications menu: gconftool-2 --set --type bool /apps/panel/applets/appmenu_default/visible true
