## **What's New in the Shark0001 ScreenMate?**

Shark0001 ScreenMate is a small software application whose purpose is to help you enhance the looks of your desktop by placing an animated mate. This particular desktop tool shows a shark that moves at the bottom part of your screen. \* Installing the application (setup files) The most convenient way to install the application is through the Internet browser. You may save it on a flash drive or other portable device. The installation process is very simple and takes about five minutes. \* Opening the application (installation options) When the setup files are downloaded, the software application is run in the browser where you may choose the installation folder. The process requires about five minutes. Once you close the installation wizard, you are welcomed to the main screen of the tool. \* Running the application (startup options) Keep it stored on pen drives The utility is portable and can be saved on USB flash drives or other portable devices so you can carry it with you all the time. In addition, you may open it straight from the storage device and run it without administrative privileges. You do not have to follow the preset steps included in an installation process because you may gain access to the GUI by running the executable file. You can also take

advantage of the fact that it does not leave entries in your Windows registry and generate additional configuration files so you may uninstall it by deleting the files that you have downloaded from the Internet.

Interactive design and a few tweaking parameters Shark0001

ScreenMate automatically places a shark on your desktop as soon as you run it. You are not offered the possibility to control the movement of the shark because the animated mate automatically moves from the left to the right or vice versa bottom part of your screen. In order to access the configuration settings, you need to right-click on the animated character. You are given the freedom to show or hide the shark, close the animation, as well as automatically run the tool at Windows startup. Tests have pointed out that Shark0001 ScreenMate carries out a task quickly and without errors. It does not eat up a lot of CPU and memory resources so it does not hamper your computer's performance. You may keep it running in the background. Final remarks If you are looking for nothing more than a simple software solution for brightening the looks of your desktop, you may give Shark0001 ScreenMate a try and see that it can do for you. It lacks support for configuration settings so it is suitable especially for less experienced users.

- \* Installing the application (setup files) The most convenient way to install the application is through the Internet browser. You may save it on a flash drive or other portable device. The installation process is very simple and takes about five minutes.
- \* Opening the application (installation options) When the setup files are downloaded, the software application is run in the browser where you may choose the
