What's New In SyncThru Web Admin Service For CLP-315?

The SyncThru Web Admin Service for CLP-315 centralized solution has powerful features, which can manage multiple devices. The solution can discover, manage, and report all Samsung devices on the network. Users can also directly access embedded SyncThru Web Service in individual devices. SNMP-compliant devices from other vendors can be discovered and managed. Get SyncThru Web Admin Service for CLP-315 and give it a try to see what it's all about!

SyncThru Web Admin Service for CLP-315 is a software utility which allows you to configure devices and manage all Samsung devices on a local network. For all intents and purposes, SyncThru Web Admin Service for CLP-315 is a standard web browser-based HTML5 interface to the embedded SyncThru Web Service on each device.

Note: SyncThru Web Admin Service for CLP-315 and the embedded SyncThru Web Service are not related.

Features:

- A web-based interface that you can use to directly access and manage embedded SyncThru Web Service in each device, even in the absence of any Internet connection
- All the standard features you expect from a SyncThru-powered solution, including the ability to discover and manage devices, report statistics about all devices, and program device settings
- Open source software; free to download and use
- Free local device support on Windows only (see local device support details below)
- Included Languages: English

What's New in SyncThru Web Admin Service for CLP-315:

- Updated to v4.3.7. Fixes for two severe bugs (e.g., in the Web Admin Web interface, when a device is added, the corresponding entry in the Device Status page will show the old device information).
- Updated to v4.3.4.
- Updated to v4.3.1. Improved search functionality when a device is discovered.
- Updated to v4.2.6. Fixed a problem when a device's IP address is not 192.168.1.100 or 192.168.2.100.
- Updated to v4.2.2. Fixed a problem when a device is added.
- Updated to v4.1.2. Added a new uninstaller for Windows.
- Updated to v4.1.1.
- Updated to v4.1.0. Added Web Admin interface.
- Updated to v4.0.2. Fixed some possible problems when the device's IP

address is not 192.168.1.100 or 192.168.2.100. Updated to v4.0.1.
The uninstaller package now contains all SyncThru Web Admin
Service for CLP-315 files. Updated to v
