What's New in the?

Tab Session Manager for Firefox is a valuable Firefox extension that can save the current state of your open tabs so that you can restore it whenever you deem necessary. The extension is quite easy to use, and it is possible to create automatic backups of your opened tabs. =====Start Time===== November 15, 2014 9:30 AM =====End Time===== November 15, 2014 4:03 PM =====Session Details===== D:\Windows\System32\mozapps\firefox\defaults\autosave.js =====Session Details===== The addon saves the current state of your open tabs in order to restore it as soon as you click the save session icon. The first time you use this extension, you need to indicate a name for the backup, which will be displayed in the “All” and “User Saved” lists. When you click the “Save” button, the extension will save your tab sessions in a folder, which is called “Session”. An ordinary Firefox addon has the ability to restore the tabs from a previously saved session, but the Tab Session Manager for Firefox gives you the chance to make backups automatically. In fact, the addon can save tab sessions either in sessions.json file or in a folder in your Firefox profile folder. Since the Session Folder can be created manually or automatically, it’s quite easy to edit the contents of the saved tab sessions. Can Create Automatic Tab Backups In case you forget to close the browser window, the Tab Session Manager for Firefox can help. You can easily set the addon to save the sessions every 10 minutes or 60 minutes. What’s more, you can also have a pre-defined number of automatic backups. This feature is accessed from the “Settings” section, where you can change the frequency of backups in hours, and add a maximum number of backups. In addition to that, the addon also gives you a chance to create new tab sessions, restore a session or remove all tab backups. Handy Firefox Extension for Increased Productivity This extension is one of the most straightforward Firefox addons that you can find, so that you don’t have to worry about confusion and confusion between the currently opened tabs. After a session has been saved, clicking the “Open” button will allow you to open the previously saved tab session. It is advisable to do that by using a new Firefox window, which can be opened automatically when you click the button. In fact, you can also easily remove the backup of a saved session. This is possible by clicking the “Remove&rd
