desktop clock application for windows. Clock Clock Plus-7 is a simple to use application that displays an analogue clock on your desktop, so you may easily check the time. The tool can easily be resized and relocated, in order to make it more convenient for you to view the exact time. Moreover, it can stay on top of other windows or hide. Simple time measuring application Desktop Clock Plus-7 displays a simple, yet stylish clock on your desktop so you may easily view the exact time, whenever you need to. The clock can be resized, to fit your requirements: for instance, you can enlarge it and have it hide under other windows or keep it to a small size and always on top. Its interface is simplistic, visually appealing and does not contain flashy colors, so it does not distract you while you are working. Moreover, the tool is useful for those users who sit further away from the monitor or who cannot view the time in the system tray. Customizable clock tool Right-click on the surface of the clock prompts the context menu with all the settings. You may increase the widget's size, little by little or set it to maximum with only one click. Similarly, you may reduce it or select the minimum option. Moreover, you can choose to enable/disable the third clock hand, which indicates the seconds, from the Options window. The other settings include set the clock to stay always on top or automatically start, with Windows. You may return to the initial settings by clicking Set to default button. Keyboard shortcuts Desktop Clock Plus-7 features two keyboard shortcuts, for quick clock customization. You may use the specified key combinations in order to increase or decrease the size of the clock, without accessing the context menu. This simple, yet stylish clock can be a convenient tool for any end-user. Clock Clock Plus-7 is a simple to use application that displays an analogue clock on your desktop, so
