What's New in the?

Wallpaper Master is a desktop wallpaper changer that comes with a great amount of configuration options and advanced features to automatically set a new desktop background at a user-defined interval. Although you may not know where to start when you first launch the app, it's only because the main window groups all features, in an attempt to make everything very easy to use. And you shall figure out which feature is which in just a few seconds, while afterwards using the program is as easy as pie. The program lets you create wallpaper categories and add photos in any of them, with ratings to vote your favorite pictures and various positions to force the pictures fit your desktop. What's more, you can scan a specific folder and even monitor it to automatically add the newest photos to the list and use them as wallpapers. Setting up the desktop background changing process is a breeze because Wallpaper Master features multiple options in this regard, allowing you to start it at a defined interval or at startup. Plus, you can set the position background color and the order, while a preview panel lets you see a selected wallpaper with ease. What's more, Wallpaper Master comes with hotkey support that allows its users to change a wallpaper, resize or stretch it, hide icons, pause and resume timer just by pressing a configured keyboard shortcut. Wallpaper Master quietly runs in the background and doesn't affect the overall performance of the system, running just fine on all Windows versions. The drawback is the limited format support, as the program can only work with JPG or GIF pictures. All in all, Wallpaper Master is one of the best apps of its kind of the market, serving its purpose with ease and offering users an impressive list of features. Desktop Synchronization for Laptop (Android and Windows) is a powerful desktop synchronization utility that lets you sync your desktop files, folders, apps, and settings from your Android and Windows based devices. Besides syncing your files and folders from all your Android and Windows devices to one single folder on your computer, Desktop Synchronization also allows you to backup your files and settings from your mobile device to your computer. Download and install Desktop Synchronization for Android from Google Play Store or Desktop Synchronization for Windows from Microsoft Store. The app allows you to sync all your files and folders in 3 ways. The sync can be done by using USB cable to connect your devices or using Wi-Fi. With USB sync, you can sync multiple Android devices (up to 3), as well as iOS, macOS, and PC (both Windows and Mac) to just one folder. You can also sync your PC with other Android or iOS devices via Wi-Fi. After installing the app, all the devices will automatically be listed in the app. Just connect the device to your computer and then click "Sync" to begin the sync. It is easy
