Internet Access Monitor For Proxy Plus Crack With License Key [32|64bit] [April-2022]

Internet Access Monitor for Proxy Plus Torrent Download is a comprehensive Internet use monitoring and reporting utility for corporate networks. Each time any user accesses any website, downloads files or images, these actions are logged. Internet Access Monitor for Proxy Plus processes these log files to offer system administrators wealth of report building options. Internet Access Monitor for Proxy Plus is a useful network monitor solution and reports creator for those who want to know what is happening on their network. The program can build reports for individual users, showing the list of websites he or she visited, along with a detailed break down of internet activity (downloading, reading text, viewing pictures, watching movies, listening to music, working). Plus, the program can create comprehensive reports with analysis of overall bandwidth consumption, building easy to comprehend visual charts that suggest the areas where wasteful bandwidth consumption may be eliminated. If you know how to make use of FTP, email, your hard drive, web browsers, or any other program, then you can set up web site deployment for an unlimited number of websites. If you want to control multiple websites with one simple program, you can use the included Web Site Control Manager and Web Site Manager. Many Internet users find it useful to know how much time they spend on the web. To enable you to keep track of this, Internet Access Monitor for Proxy Plus, reports on how much time the users spent on each website. But if you're using the Internet for business purposes, you probably don't want every one of your employees to know how long they spend at each site. Internet Access Monitor for Proxy Plus, lets you make time budgeting a simple matter of designating a certain number of hours each week for web surfing. For example, you might want a few employees to surf the web all day, and a different group of employees to surf the web just an hour a day. You can also make your employees aware of how much time they spend at a specific site by placing links to that site in the email messages that they get. The program includes a useful scheduler that will allow you to manage the settings, and a scheduler that allows you to manage your sites. Internet Access Monitor for Proxy Plus Description: Internet Access Monitor for Proxy Plus is a comprehensive Internet use monitoring and reporting utility for corporate networks. Each time any user accesses any website, downloads files or images, these actions are logged. What's New in the Internet Access Monitor For Proxy Plus?

Internet Access Monitor for Proxy Plus is a comprehensive Internet use monitoring and reporting utility for corporate networks. Each time any user accesses any website, downloads files or images, these actions are logged. Internet Access Monitor for Proxy Plus processes these log files to offer system administrators wealth of report building options. Internet Access Monitor for Proxy Plus is a useful network monitor solution and reports creator for those who want to know what is happening on their network. The program can build reports for individual users, showing the list of websites he or she visited, along with a detailed break down of internet activity (downloading, reading text, viewing pictures, watching movies, listening to music, working). Plus, the program can create comprehensive reports with analysis of overall bandwidth consumption, building easy to comprehend visual charts that suggest the areas where wasteful bandwidth consumption may be eliminated. Main features: Internet Access Monitor for Proxy Plus offers the following features: 'History Browser' - internet use report template - built for usage monitoring, network speed reporting and user reporting. With the 'History Browser', you can have a history of internet use for every user on your company network, and browse your users' internet history in a detailed report. Report Builder - 'Default' report template - a wide choice of different report templates allowing you to create your own report template. 'Interactive' report template - a 'windowing' report template, which allows you to create an interactive report, where you can pause or stop any action from the user's internet history. 'Bandwidth counter' - an object tracking utility, which can monitor the bandwidth consumption of every internet service on your network. The program can track bandwidth usage of every internet service that your computer uses, making it possible to recommend the optimal solution for your network. 'Time-based', 'Service-based' and 'user-based' network usage reports - Internet Access Monitor for Proxy Plus will create any number of reports for you, depending on your specific needs. All the reports have the ability to present and break down any internet usage, as well as monitor the network bandwidth, provided by internet services. 'Character encoding' - if your user is viewing some web pages in different languages, this tool will decode the text to its original language. This report is ideal for companies that have their sites set up in different languages. 'Code analysis' - using a built-in code analyzer, Internet Access Monitor for Proxy Plus can detect any malicious software, such as viruses, trojans and spyware. This software utility will then recommend to you the most effective solution, to eliminate the software that's interfering with your computer. Availability and requirements: Internet Access Monitor for Proxy Plus is available as a free download for both 32-bit and 64-bit Windows platforms. It is compatible with Windows 2000, Windows XP, Windows Vista and Windows 7. It requires a minimum of Microsoft.NET Framework 3

System Requirements For Internet Access Monitor For Proxy Plus:
