GreatCirc is a software application that can be used in order to find out the distance between two points or cities on the Globe, as well as view the world map. User-friendly interface The installation process does not offer to download any kind of products that are not actually necessary for the program to fully function, and it is over in a jiffy. Once you complete it, you come by what seems to be a pretty overwhelming interface, as it contains a lot of information, yet it is quite well-organized, presenting a menu bar, a few tabs and an interactive world map. Furthermore, Help contents are provided, thus ensuring that both beginners and highly experienced people can find their way around it, without experiencing any kind of issues. Types of calculations available This software tool enables you to find out the shortest distance between two given points or cities, the end point, given start, direction and distance details, as well as the distance between two specified points along a line of constant bearing. It is also possible to find a circular coverage area, given a central start point and the radius. View longitude and longitude coordinates and change the shape of the Earth It is important to understand that all these calculations are made taking into consideration the Earth's shape and you can select the points by simply clicking on the world map provided in the main window. In addition to that, the latitude and longitude coordinates of each point are immediately detected and displayed, while the results are displayed in miles and kilometers. It is possible to calculate the distances between two major cities, by selecting them from a huge built-in list, the shape of the Earth can be changed from a WGS84 ellipsoid to a spherical Earth, and show or hide the latitude and longitude grid. Conclusion With an intuitive interface, good response time, minimal usage of CPU and memory and comprehensive Help contents, GreatCirc proves to be a pretty efficient and reliable piece of software, when it comes to making calculations on the Earth surface. The application contains a complete reference list to help you discover an infinite range of musical information. It is free, easy to use and has a minimalist interface, which facilitates its use by almost everybody. It is no doubt that learning the guitar has become one of the most popular hobbies on the planet. Not only it is necessary to learn to play the instrument, but also keep yourself updated with the latest musical information, in order to be an effective musician. The most widely used strategy for learning the guitar is learning the music using music theory. There are many different types of music theory, such as chords, progressions, scales, pentatonic scales, modes and many others. However, some people may prefer a more straightforward strategy to improve their musical skills. With DJ Guitar Companion you can discover hundreds of songs and lyrics in order to improve your skill on the Guitar and you will be able to remember them and you can use them while you are jamming. Furthermore, you will be able to open your songs in the RhythMeter and learn the chords, progressions, scales, modes and any other musical knowledge you want. Moreover, the application also allows you to check out the history of songs, while it can also be used to create new songs. Thanks to the built-in recorder you can also learn songs and your favorite artists by playing the chords, playing along, learning the lyrics, record them and save them. The application offers a user-friendly interface and has a minimalist design, which allows you to focus on your musical skill. Since it is free, you do not need to worry about a large number of annoying ads and you can easily install the application without downloading a single file. It is possible to download and use the application right away, from the Google Play Store. Using an intuitive interface, the application allows you to do basic calculations on chords, progressions, scales, modes and lyrics. It is important to understand that the interface allows you to scroll the screen for a better view. How much time do you spend hunting for music?
