My thread which i am using is taking too much time. So in that time how can i stop that thread and continue with another thread or is there any other way to pause it? A: How can i pause or stop a thread which is currently working in android. There is no way to "pause" a thread in Android, since Android does not support threads. The Android documentation states: You should never call Thread.interrupt() or Thread.suspend() directly on your own thread, because the results of such calls are undefined. If you call them on other threads, the results are undefined and may be unpredictable. Sonic Animation Sonic Animation, created in 2007 by Matt Hubbard, is an open-source, frame-by-frame compositing and imaging software package that can be used to create music videos, movie trailers, short animated films, and interactive designs. Sonic Animation uses compositing and imaging algorithms to produce, edit, and render the output of a digital camera. The program operates as a video f988f36e3a
