This project is a simple and lightweight macro recorder for Visual Studio. Macros can be recorded either from GUI actions or the IDE keyboard shortcuts. Developer: Visual Studio 7, 8, or 9 License: Shareware Price: USD 19.95 System requirements: Windows 2000/XP/Vista/Win 7/Win 8/Win 10 Minimum storage requirements: 1 MB Spire.PDF for.NET is a utility that can help developers implement PDF reading, writing and manipulating functions within their.NET application. This tool can help users generate PDF content or edit existing one with ease directly from their programs, without relying on third-party software (e.g. Adobe Acrobat). It offers support for numerous functions, including certain security settings, extraction of PDF content (be it text, attachments or images), updating metadata, optimizing paragraphs or sections and splitting or merging documents. Programmers can incorporate various conversion options to their application, rendering it able to generate PDF content from RTF, TXT, XPS, HTML and image files. Alternatively, the reverse is also possible, therefore programs can be set to convert PDFs to many other file types, including EMF, BMP, PNG, TIFF, and other text formats. Spire.PDF for.NET allows users to implement document merge or split functions within their application, so they do not need to resort to any other software solution. Additionally, it can be set to overlay existing pages from the original document with the current ones, if available. Developers can opt for data extraction features that allow them to grab text, images and other attachments from the processed documents. This tool can also add security features to.NET applications, thus helping users protect PDF files with ease by setting passwords and encrypting them directly from their application. Users that need to familiarize themselves more with some of the concepts used within this development tool can access the comprehensive help manual and look for specific issues. KEYMACRO Description: This project is a simple and lightweight macro recorder for Visual Studio.
