What's New in the Credits Tracker?

Credits Tracker is a lightweight and easy to use application designed to help students keep track of their courses, grades and the required number of credits. The usage is simple: you can add a new subject to the list by entering its prefix and ID number, name, as well as the corresponding number of credits and the grade. The number of completed and remaining credits is automatically determined. Credits Tracker Features: The application is designed to be used with any course platform (courses in Moodle are the most common) and any course platform offers excellent functionality for tracking the number of credits. Credits Tracker does not use any server-side functionality, so the number of credits you enter in the application stays in the application. There is a comprehensive help file for use with Moodle, which also offers the possibility of importing and exporting the information in XML format for other applications. Credits Tracker does not save the number of credits and the grade, since it is not intended to be used as a gradebook. Credits Tracker works for a whole semester or year if you import the information into your Moodle and set the start and end of the semester/year in your course platform. Credits Tracker allows you to enter the number of credits per grade (A, B, C, D, etc.) as well as the degree of completion of a course (passed, incomplete, not started, etc.). This information is not saved, however. Credits Tracker is easy to use and completely free for all students and teachers. Credits Tracker is free for private use. If you wish to use the application for business purposes, you will need to obtain a license. For details on this, please contact the sales department at credits-tracker.com. Credits Tracker Updates: 5.2.6: - Missing newline after subjects - Missing newline after grade entries - Fixed bug: The user was not shown the remaining credits when the course was over - Fixed bug: Possible calculation error when importing a grade from another application - Fixed bug: Possible double calculation error when importing a grade from another application - Fixed bug: Possible crash if a subject with a grade was added while the course had just started - Fixed bug: Some errors with the import of grades from another application were not displayed - Fixed bug: Possible error if a subject was added with the same ID number as another subject - Fixed bug: Possible error if the same ID number was used for two subjects - Fixed bug: The XML export for Moodle could not be created - Fixed bug: Missing newline after grade entries Credits Tracker is a lightweight and easy to use application designed to help students keep track of their courses, grades and the required number of credits. The usage is simple: you can add a new subject to the list by entering its prefix and ID number, name, as well as the corresponding number of credits
