It is common that people can't wait the time when the snow is gone and the new leaves make the world bright. After all, in this period, spring arrives and we may have a feeling of the happiness. This is true, of course, to us all, it is just that some people experience such feeling on the first of may and others feel it on the first of june. The main idea of this article is to associate the main concepts of spring with the Mayan festivals. Together with the Mayan calendar, we will find out that it is extremely important to know how to count in Mayan number system. After all, the knowledge of Mayan calendar and all Maya artifacts will allow us to understand a lot of ancient secret technologies and civilizations. In the following, we will try to describe the basic features of the Mayan calendar.

**Mayan calendar basics**

The Mesoamerican culture has a number of very ancient civilizations, the first of which was the Maya culture. It existed in the region of Mexico. In the beginning of that culture, people used to worship the gods and naturally, because of that, they were involved in the ceremonies and rituals. However, it was not the only act of the ancient culture. They also did lots of other activities, for instance, they had agriculture, they made specialized crafts, and, of course, this is the most important, they used to make and store the knowledge. The knowledge was conveyed in the form of writing. The Maya civilization is known for its incredible knowledge and cultural achievements. One of the things that make this civilization famous is their writing system. Of course, writing is a concept that used to exist even before the Mesoamerican culture. The ancient Egyptian culture was the first to develop writing in the form of the cartouche. It was discovered in the tombs of ancient Egyptians in the beginning of the XXI century of our era. Modern people can see the meaning of the word "cartouche" even now. Well, this is how we can imagine the concept of the written word. Nowadays, the cartouche is an ornamental motif, although the ancient Egyptians used it as a way to name places, streets, and graves. In this article, we will discuss how the Maya civilization used to write a lot. One of the things that people can notice about the ancient Mayan writing system is that the glyphs look different from one another. It makes the decoding process difficult and

Mcgraw Hill Ryerson, and AP have teamed up to provide AP Statistics and AP Macro and AP Maths, and even the. 14, McGraw Hill Ryerson, ISBN. Functions 11- Chapter 1. Functions 11-Solution Manual... Mcgraw Hill Ryerson *Stenotrophomonas maltophilia* is an important cause of bacteremia and lung infections in cancer patients and, increasingly, in non-immunosuppressed persons. *S. maltophilia* is resistant to many antibiotics and has the potential to cause ventilator-associated pneumonia (VAP) and bacteremia associated with severe sepsis and septic shock. Most *S. maltophilia* isolates are able to form biofilms on biomaterials (e.g., indwelling venous catheters), which increases their resistance to antibiotic and host defenses and makes eradication of this organism difficult. Biofilms are a novel virulence factor for organisms such as *S. maltophilia*, which have generally been considered non-biofilm forming. Our overall goal is to define the molecular and cellular mechanisms underlying the formation of biofilms and to define the factors that increase the risk of biofilm formation
