A number of Adobe Photoshop updates will be rolled out this week. A release of 2019.2 for Elements was given this week to address a number of issues raised by users, but it was discovered on Tuesday that Adobe had quietly added a new mode, called Super Resolution, to Photoshop. The mode enables designers to create images 3X bigger than their original image and to then scale the image down to fit the target website, just as with its stock photo service. In other words, the idea, which has been available since 2012 in Photoshop, is now in Elements.

Hi, I am Pruthvi, an author and digital marketer from India. I started working on a tech blog, since 2014.I'm currently growing my own peppermint and spearmint and love the smell. I tried growing roses when I moved here but the dogs left me with lumps on my face. I though I would grow them inside my kitchen but it wasn't doing my skin any good even though I was using clean water and a healthy diet. I got a couple of petri dishes and put a sprinkling of soil in each one and slowly added some fertilizer (Yeast based) and Aloe Vera gel. I added some fresh water in the top and while I waited for the plants to show growth, I set the petri dish in them for about a week. Then I replanted in about six more petri dishes and kept them in the house for about four weeks. Easy as that. I got two plants in a three tier system. The top shelf was to be used to grow the peppermint or spearmint, the middle home is for container roses and the lowest shelf is for the healthy food. I take them with me to work and eat balanced meals. I also tend to the plants with a small watering can and apply the Yerba Mate tea just like I would water my lawn. Greener garden! I have grown peppers and flowers indoors before but never succesfully and during the winter in Houston, since the temperatures can drop to as low as 47 degrees Fahrenheit. This way, I plan to be ready for summer when the temperatures will be above 75 degrees and the plants aren't going to die. The peppers and flowers are growing now in the glass and will be planted out to the patio this week. If anyone has any other tips to grow flowers, please feel free to share! You can also find me on facebook, instagram, twitter, youtube, and I'm also a woodblock artist.1.
