On the left side of screen, you get full-screen mode, a new Touch History feature, a focus assist tool, new shapes tools, new adjustment layers (like Curves, a mask, strokes, etc.), selection tools, new path tools and a whole host of other tools. Some of the new features come at the cost of "preserving some of the legacy features" like the spell check, and features that have not been updated firsthand. In general, the editing experience has improved. Using the new high-resolution lens, on tons of Creative Cloud apps, I have gotten better results with the redesigned out-of-box features.
