

Kuassa Amplifikation Matchlock V1.0.1 Incl Patched And Keygen (WiN And OSX)-R2R

Kuassa Amplifikation Matchlock v1.0.1: The Ultimate American Amp Simulator

If you are looking for a realistic and dynamic amp recording experience for your guitar, you might want to check out Kuassa Amplifikation Matchlock v1.0.1. This is the latest version of Kuassa's best amp simulator yet, inspired by the classic Fender* combo amps that shaped the sound of rock n roll. Kuassa Amplifikation Matchlock v1.0.1 is the second product from Kuassa's 3rd gen Tube Simulation technology, following the much hyped Amplifikation Caliburn. It features 3 amp types, taken influence from Fender's* popular amps: Twin Reverb*, Super Reverb*, and Custom Vibrolux Reverb*. Each amp has 2 channels: Clean and Boosted, with power amp Sag and Bias feature for more tonal variation. Not only that, Kuassa Amplifikation Matchlock v1.0.1 also offers five types of cabinets, high pass and low pass filters, seven types of workhorse mics, and a freely adjustable dual-miking with mono or stereo configuration. You can also use the noise gate and limiter to control your signal level and avoid unwanted noise. Kuassa Amplifikation Matchlock v1.0.1 has a photorealistic graphics for lifelike guitar playing experience, and a straightforward and easy to use interface. It supports up to 8x oversampling for better sound quality and performance. Whether you want to play clean or with effect pedals, Kuassa Amplifikation Matchlock v1.0.1 will give you the heritage of the classic American sound to your desktop. You can download it now from Kuassa's website or from various online stores^[1] ^[2]. It is available for Windows and Mac OS X, in EXE, VST, VST3, AAX (MODiFiED), APP, and AU formats. Don't miss this opportunity to get one of the best amp simulators on the market today. Kuassa Amplifikation Matchlock v1.0.1 will make your guitar sound amazing! What makes Kuassa Amplifikation Matchlock v1.0.1 different from other amp simulators? Well, one of the main features is the 3rd gen Tube Simulation engine that Kuassa developed. This engine simulates the behavior of real tubes in a circuit, resulting in a more natural and dynamic sound. You can also adjust the power amp Sag and Bias to change the response and feel of the amp. Another feature that sets Kuassa Amplifikation Matchlock v1.0.1 apart is the dual-miking option. You can choose from seven types of microphones, each with its own character and frequency response. You can also mix and match two different mics, and adjust their position, distance, angle, and level. This gives you a lot of flexibility and control over your tone. Kuassa Amplifikation Matchlock v1.0.1 is not only suitable for electric guitars, but also for other instruments such as harmonicas and synthesizers. You can use it to create a variety of sounds, from warm and clean to crunchy and distorted. You can also use it as a pedal palette, and experiment with different effect pedals to shape your tone. Kuassa Amplifikation Matchlock v1.0.1 is a must-have for any guitar player who loves the classic American sound. It is easy to use, versatile, and realistic. It will make your guitar sound like it's plugged into a real Fender* combo amp.
