Symantec System Recovery 2013 License Key ((FULL))

How to Install and Activate Symantec System Recovery 2013 R2

Symantec System Recovery 2013 R2 is a powerful backup and recovery software that can protect your data and systems from disasters. It can create image-based backups of your entire system or selected files and folders, and restore them to any hardware or virtual environment. It also supports granular recovery of Microsoft Exchange and SharePoint data, as well as conversion of backups to virtual machines. However, to use Symantec System Recovery 2013 R2, you need a valid license key that matches your edition (Desktop, Server, or Linux). In this article, we will show you how to install and activate Symantec System Recovery 2013 R2 with a license key.

Step 1: Download the Software

The first step is to download the software from the Veritas website. You need to sign up for an account and access the [Base and upgrade installers](#) section. There, you can find the zip file for Symantec System Recovery 2013 R2 that contains the installer for your edition. For example, if you have a license key for the Desktop Edition, you need to download the file named `System_Recovery_2013R2_11.1.6.55604_Multilingual_Product.zip`.

Step 2: Unlock the Zip File

The next step is to unlock the zip file that you downloaded. To do this, right-click on the file and select **Properties**. Then, check the box next to **Unblock** at the bottom of the dialog box and click **OK**. This will allow you to extract the files without any errors.

Step 3: Run the Installer

The third step is to run the installer for Symantec System Recovery 2013 R2. To do this, double-click on the file named `Browser.exe` inside the zip file. This will launch a wizard that will guide you through the installation process. You need to accept the license agreement, choose a destination folder, select the components to install, and configure some settings. You can also choose to create a recovery disk during the installation.

Step 4: Reboot the System

The fourth step is to reboot your system after the installation is complete. This will ensure that all the changes are applied and that Symantec System Recovery 2013 R2 is ready to use.

Step 5: Add Your License Key

The final step is to add your license key to Symantec System Recovery 2013 R2. To do this, open the Symantec System Recovery 2013 R2 console and click on **Help > Licensing**. Then, click on **Add License Key** and enter your license key in the dialog box. Click **OK** and then **Close**. Your license key should be validated and activated. If you encounter any errors while adding your license key, make sure that you have entered it correctly and that it matches your edition. Also, make sure that your system meets the minimum requirements for Symantec System Recovery 2013 R2 and that it is compatible with your Windows version. You can check these details on the [Symantec System Recovery 2013 R2 General Information page](#).

Conclusion

Symantec System Recovery 2013 R2 is a great solution for backup and recovery of your data and systems. However, you need a valid license key to use it. In this article, we showed you how to install and activate Symantec System Recovery 2013 R2 with a license key. We hope this article was helpful and informative.
