## **How to Mirror Your Phone Screen to PC with Apowersoft ApowerMirror 1.4.5.1 incl Patch**

If you want to enjoy your phone's content on a bigger screen, you need a reliable screen mirroring app. One of the best options available is **Apowersoft ApowerMirror 1.4.5.1 incl Patch**, a powerful and versatile tool that lets you mirror your phone screen to PC wirelessly or via USB. With Apowersoft ApowerMirror 1.4.5.1 incl Patch, you can stream photos, videos, games, and other media files from your phone to your PC or projector without any lag. You can also control your phone from your PC using your mouse and keyboard, which is convenient for sending messages, playing games, or giving presentations. In this article, we will show you how to use Apowersoft ApowerMirror 1.4.5.1 incl Patch to mirror your phone screen to PC in a few simple steps.

### **Step 1: Download and install Apowersoft ApowerMirror 1.4.5.1 incl Patch**

The first thing you need to do is download and install Apowersoft ApowerMirror 1.4.5.1 incl Patch on your PC and phone. You can get the software from the official website<sup>[1]</sup> or from Filehippo<sup>[2]</sup>. The installation process is quick and easy, and you don't need any third-party software to run the app.

### **Step 2: Connect your phone to your PC**

Once you have installed the app on both devices, you can choose to connect your phone to your PC via WiFi or USB. If you want to connect via WiFi, make sure both devices are on the same network. Then, launch the app on your PC and phone, and scan the QR code on your PC screen with your phone camera. Alternatively, you can tap the "WiFi Connection" button on your phone app and enter the PIN code displayed on your PC screen. If you want to connect via USB, simply use a USB cable to connect your phone to your PC. Then, enable USB debugging on your phone settings and allow the app to access your phone data.

### **Step 3: Mirror your phone screen to PC**

After connecting your phone to your PC successfully, you will see your phone screen mirrored on your PC screen automatically. You can adjust the display settings according to your preference, such as landscape mode, full-screen mode, or window mode. You can also use the buttons on the right side of the PC app to access various functions, such as taking screenshots, recording screen, drawing on screen, or switching devices. To control your phone from your PC, you can use your mouse and keyboard as if they were your phone's touch screen and keypad. You can also use the pre-set virtual keys for Android games or customize them according to your needs.

## Conclusion

Apowersoft ApowerMirror 1.4.5.1 incl Patch is a handy and user-friendly screen mirroring app that allows you to mirror your phone screen to PC with ease. Whether you want to watch videos, play games, or share content with others, this app can help you achieve a better visual experience and more convenience. If you want to try this app for yourself, you can download it from the links below and follow the steps above to start mirroring your phone screen to PC.
