

How to Download and Install SuperDVR TD3004 USB Software

If you are looking for a reliable and easy-to-use software for your SuperDVR TD3004 USB card, you have come to the right place. In this article, we will show you how to download and install the latest version of SuperDVR software for your device. SuperDVR is a software that allows you to view and record video from your TD3004 USB card, which is a 4-channel video capture card that supports up to 30 frames per second. With SuperDVR, you can monitor your cameras remotely, playback recorded files, backup data, and configure various settings. To download and install SuperDVR TD3004 USB software, you need to follow these steps:

1. Visit the official website of SuperDVR at <https://superdvr.software.informer.com/6.3/> [^ 1 ^]. This is the latest version of the software as of January 2023.
2. Click on the "Download" button and save the file to your computer. The file name is DVR.exe and the size is about 40 MB.
3. Run the DVR.exe file and follow the instructions on the screen to install the software. You may need to restart your computer after the installation.
4. Connect your TD3004 USB card to your computer using a USB cable. Make sure the card is recognized by your system.
5. Launch the SuperDVR software from your desktop or start menu. You will see a login window where you need to enter your username and password. The default username is admin and the default password is 123456.
6. After logging in, you will see the main interface of SuperDVR where you can view and record video from your cameras, as well as access other features and settings.

Congratulations! You have successfully downloaded and installed SuperDVR TD3004 USB software for your device. Now you can enjoy the benefits of this software and make the most of your TD3004 USB card.

How to Use SuperDVR TD3004 USB Software

Now that you have downloaded and installed SuperDVR TD3004 USB software for your device, you may wonder how to use it effectively. In this section, we will give you some tips and tricks on how to use SuperDVR software for various purposes.

How to View Live Video from Your Cameras

One of the main functions of SuperDVR software is to allow you to view live video from your cameras connected to your TD3004 USB card. To do this, you need to follow these steps:

1. On the main interface of SuperDVR, click on the "Live" button on the top left corner. This will open a new window where you can see the live video from your cameras.
2. You can switch between different camera channels by clicking on the numbers below the video window. You can also drag and drop the video windows to rearrange them.
3. You can adjust the brightness, contrast, hue, and saturation of the video by right-clicking on the video window and selecting "Image Adjust".
4. You can zoom in and out of the video by using the mouse wheel or the buttons on the bottom right corner of the video window.
5. You can capture a snapshot of the video by clicking on the "Snapshot" button on the bottom left corner of the video window. The snapshot will be saved in a folder named "Snapshot" under the installation directory of SuperDVR.
6. You can record the video by clicking on the "Record" button on the bottom left corner of the video window. The recorded file will be saved in a folder named "Record" under the installation directory of SuperDVR. You can also set a schedule for recording by clicking on the "Schedule" button next to the "Record" button.

How to Playback Recorded Video from Your Cameras

Another function of SuperDVR software is to allow you to playback recorded video from your cameras connected to your TD3004 USB card. To do this, you need to follow these steps:

1. On the main interface of SuperDVR, click on the "Playback" button on the top left corner. This will open a new window where you can see the recorded files from your cameras.
2. You can select a date and time range by using the calendar and slider on the left side of the window. You can also filter the files by channel, file type, and file size by using the buttons on the top right corner of the window.
3. You can double-click on a file to play it in a new window. You can also drag and drop multiple files to play them simultaneously.
4. You can control the playback by using the buttons on the bottom of the window. You can pause, resume, stop, fast forward, rewind, and adjust the volume of the playback.
5. You can take a snapshot or clip a segment of the playback by using the buttons on the bottom right corner of the window. The snapshot or clip will be saved in a folder named "Snapshot" or "Clip" under the installation directory of SuperDVR.
6. You can backup or delete a file by right-clicking on it and selecting "Backup" or "Delete". The backup file will be saved in a folder named "Backup" under the installation directory of SuperDVR.

How to Configure Settings for Your Cameras and Software

The last function of SuperDVR software is to allow you to configure various settings for your cameras and software. To do this, you need to follow these steps:

1. On the main interface of SuperDVR, click on the "Setup" button on the top left corner. This will open a new window where you can see different tabs for different settings.
2. You can configure settings for your cameras by clicking on the "Camera" tab. Here you can set parameters such as camera name, resolution, frame rate, compression mode, motion detection, alarm output, etc.
3. You can configure settings for your software by clicking on the "System" tab. Here you can set parameters such as user management, network settings, email settings, PTZ settings, etc.
4. You can configure settings for your device by clicking on the "Device" tab. Here you can set parameters such as device name, device ID, device password, device time, device upgrade, etc.
5. You
