The different types of armchairs can serve many purposes in your home. A tub chair or contemporary armchair can be a perfect complement to your sofa arrangement. A wingback or high back armchair can create a great reading spot, with a strategically positioned floor lamp placed beside it. A small armchair that is easy to move is perfect for offering some extra seating when you have guests over. And a classical rocking chair can be the perfect place to sit when knitting a nice long scarf. Are you looking to create the ultimate spot to relax in your home? See our recliner chairs. With a recliner chair you can easily adjust the backrest to accommodate your needs. Sit up when enjoying a magazine or a good book and lay down when you want to rest your eyes or take a nap. Accidents happen. And spilling food or drink in an armchair could leave an irritating stain in the fabric. To combat this, several of our armchairs and recliners have a removable cover, which mean you can just throw it in the washing machine to remove the stain. If your chair doesn't have removable covers, you can try cleaning the stain with a damp cloth. Use

together with some upholstery shampoo for particularly stubborn stains. Once you've found your new armchair, make sure to read the care instructions for more tips on how to take care of it To maximize the comfort with your armchair, add a cushion and a soft, warm blanket to cuddle up in. We have cushions and cushion covers in different sizes, colors and patterns. Our comfy blankets and throws also come in different styles, so everyone can find one matching their armchair and recliner. Beautiful accent chairs don't have to cost a fortune, you just have to know where to shop for them! I've found all the best sources for affordable (and sometimes downright cheap) accent chairs. Plus I've picked 50 of my favorite options! Over the past 20 years of being a homeowner, I have sourced accent chairs for myself, friends and even clients many, many times. And you know, I am ALWAYS on the lookout for a good bargain because I love sharing my favorite furniture and decor shopping guides with you! I'm happy to report that I have once again I have sniffed out the best sources for affordable accent chairs. Accent chairs are **single-seat** chairs that are added to rooms to

provide extra seating and extra comfort in a room. They are sometimes called side chairs or lounge chairs. I especially love living room and family room arrangements that use sofas and accent chairs. They not only look more interesting, but they tend to be conducive to conversation if you have guests over. In our own family room, we have paired our sectional sofa with this leather recliner (sadly it was not under \$500 so I haven't included it in this list of cheap accent chairs, but you can read my full review of the West Elm Spencer Recliner if you are in the market for one). And in our bonus room we've paired a loveseat with two accent chairs (which are also recliners that were super affordable but they are no longer available). It is absolutely possible to find stylish recliners, but it is very hard to find them under the \$500 mark so you'll only see a few on this list! Target is still one of the best sources for accent chairs that are beautiful without being cost-prohibitive. And the selection is great! Target has everything from fabric chairs to faux leather chairs. I LOVE Target and generally find everything from their colorful shower curtains to their furniture pieces

that I own to be good quality and great value. Below are a few of my favorite accent chairs from Target. World Market is an under-utilized resource when it comes to decorating your home! It's one of my go-to sources for things like bathmats, planters, and definitely colorful Christmas decor! And though World Market doesn't have a huge selection of furniture, what it does offer is reasonably affordable and solid quality! Below are some of my favorite armchairs and accent chairs from World Market. The blue velvet swivel chair and faux sherpa chairs have me wishing I had somewhere to put them! The selection of armchairs and lounge chairs available at Wayfair is ENDLESS. Lots of them are of high on style but easy on the budget. And most of the upholstery-covered chairs come in at least a few different color options (some offer 10+ colors). Below are some of my favorites Wayfair accent and lounge chairs. Amazon: Yep! AMAZON has some of the most affordable and most beautiful accent chairs. That set of faux leather chairs you see below is under \$500 for the pair. They would be perfect to pair with an affordable sofa in a living room! And if you are a

Prime member like me, most of them come with FREE two-day shipping. It's hard to beat that. There are literally countless accent chairs under the \$500 price point on Amazon. You can see some of my personal favorites below. I know it sounds weird to look for furniture on Home Depot's website, but just trust me on this. I found pages and pages of accent chairs under \$500 on Home Depot's site. I even found a couple of pairs of accent chairs that come under the \$500 mark together! You can see some of my favorite picks (most of which are available in lots of different colors) below. Oh how I love Urban Outfitters. It's always the first place I look when I am hunting for colorful shower curtains and colorful bathmats (you'll understand why if you go look). And when it comes to home decor items, I find Urban Outfitters' prices to be reasonable. Sadly, its furniture is kind of pricey. But I found these three GORGEOUS accent chair options that are under \$500. I don't know how comfortable the rattan chairs are, but talk about making an impact in a room!
